

History of the SFAFS Science Fair Program Since Inception

From 2007-8 through 2009-10, SFAFS did not judge all SFPS fairs. Non-SFPS schools (the difference between the red and green lines) all lie within the greater Santa Fe area (including Pojoaque).

History of SFAFS science fair judging, including all schools (SFPS + others) and the SFPS District Expo. The “Total Volunteer Hours” line includes commuting time for judges and time spent on managing the fair program over and above judging. The dip in the green line is explained in the caption below.

In 2011-12 and 2012-13, SFAFS judged only inquiry-based projects. The non-IB projects were judged by school personnel. In the other years, the number of judgments exceeds the number of projects because the EXPO is a re-judging of existing projects.
