

Science Cafes for Young Thinkers

Electromagnetism: A Tale of Two Fields

Thursday, March 30th
6:00-7:30 PM
Georgia O'Keeffe Museum
Education Annex
123 Grant Avenue, Santa Fe

When most of us think of magnets our first thoughts are probably of those things stuck to our refrigerators. Join us to learn the basics of electromagnetism, its role in our everyday lives, and how scientists use the world's strongest magnets to learn more about the properties of advanced materials.

Laurel Elaine Winter Stritzinger, PhD Laurel earned her PhD in physics from Florida State University. She is currently a postdoctoral researcher at the National High Magnetic Field Laboratory pulsed field facility located in Los Alamos, studying a variety of differential materials.

Free Admission & Snacks

Open to all but seating a priority for youth (ages 13-19)
Visit sfafs.org for more information or email: info@sfafs.org.
