Santa Fe Science Café for Young Thinkers

"The Application of Brain Science to Everyday Life"

Chris Forsythe
Sandia National Laboratories

Tuesday, January 12
6:00-7:30 PM

Georgia O'Keeffe Museum
Education Annex
123 Grant Avenue, Santa Fe

There is no field of science that more directly bears on everyday life than brain science, or "neuroscience." Our every experience is mediated by the brain, with its functions dictating our effectiveness, productivity and happiness. My presentation will focus on examples from the vast volumes of neuroscience research to identify, discuss and make relevant several key findings that directly speak to the life experiences of everyone.

Admission is Free. Youth (ages 13-19) seating a priority. Light efreshments will be served. Chris will appear on the KSFR Radio Café (101.1 FM) with host Mary Charlotte at 8:30 AM that day.

Chris is a member of the technical staff at Sandia National Laboratories, and President of the Brain Hackers Association, an organization that provides youth opportunities in neuroscience. His PhD in Experimental Psychology from the Univ. of Memphis.

Sponsors: Santa Fe Alliance for Science; Santa Fe Public Schools; Georgia O'Keeffe Museum. Call 505-603-7468 for more information or visit www.sfafs.org.
