Santa Fe Science Café for Young Thinkers

"Fracking: The Monster in Our Background"

Larry Kilham
Author and Businessman

Wednesday, October 10
6:00-7:30 PM

Georgia O'Keeffe Museum
Education Annex
123 Grant Avenue, Santa Fe

Fracking is an established technique for unlocking natural gas from deep shale rock. New equipment designs and the pressure for new cheap energy have brought fracking to center stage. Come learn the science and technology of fracking and the trade-offs between tapping the much-needed energy from this source and carbon and water pollution that results. There are no "right" answers. This will be a growing major issue in New Mexico.

Admission is Free. Youth (ages 13-19) seating a priority. Light refreshments will be served. Larry will also appear at 8:30 AM the same day on the **Santa Fe Radio Café** (KSFR 101.1 FM) with host Mary Charlotte streaming from www.ksfr.org.

Larry was educated at the University of Colorado and MIT. He has worked at number of high tech companies. He is an author of three books, a corporate director, a member of the Santa Fe Alliance for Science, and is keenly interested in the relationships between energy and ecology.
